

Mover's Choice – Zurich Virtual Consulting service site guide:

Mover's Choice and Zurich have teamed up to provide your organization with tailored services via Zurich Services Corporation, Risk Engineering's new and innovative micro internet-service site. We have created the Virtual Consulting micro-internet service site to allow easy access to customized risk management and safety information within a secure online system exclusively for the Mover's Choice package and workers' compensation programs.

Once your organization becomes a customer of the Mover's Choice program, you will have direct access to several tools that can support your company's risk management and safety program. The following tools are located within the specialized internet-service site:

- Virtual Consulting
- Zurich Online Training
- eZ Transition

Virtual Consulting: The Virtual Consulting quick link will build a customized Virtual Consulting report for your company. This industry-leading service is provided at no additional cost to all Mover's Choice / Zurich customers providing self-service access to loss control tools and resources, including:

- Inspection checklists
- Safety plans
- Sample procedures
- Technical information
- Videos
- Links to other useful web sites

In addition to identifying the most common hazards in the moving and storage industry, the site provides real-world solutions. Additionally, Virtual Consulting, being intranet-based, is available anytime it is needed. By providing data-driven insights into loss exposures, and then helping translate these insights into practical actions, Virtual Consulting generates tangible value for our customer's business – quickly and easily.

Zurich Online Training: Click on the Zurich Online Training quick link to learn more about this exciting internet based learning management tool. We offer over 30 training modules free to your organization as a Mover's Choice / Zurich customer to support your risk management and safety knowledge and skill development needs. Each customer will receive their own learning management portal where they can manage individual employee safety competency development.

eZ Transition: eZ Transition provides you with the necessary return-to-work tools and resources to help reduce workers' compensation, disability and worker replacement costs. It focuses on the three phases of return-to-work strategy including pre-injury, injury management and return-to-work. eZ Transition contains information necessary to help you decrease production delays, promote earlier communication, and awareness of employee injury. It also provides information to help increase consistency in addressing the Family and Medical Leave Act and the Americans with Disabilities Act.

Virtual Consulting access:

- [Click here](#) to access the site
- First time users enter the account's **seven (7) digit policy number** and **effective date** and click on submit

Mover's Choice is a complete commercial insurance program specially designed for the household goods moving and storage industry. Our program includes coverage for [Auto Liability](#), [Auto Physical Damage](#), [Workers Compensation](#), [Cargo/Warehouse Legal Liability](#), [Property, General Liability](#), [Crime](#), [Surety Bonds](#), and [Independent Contractor Work Injury Program](#).

[Click here to learn about how CSA 2010 can affect your business](#)

NEW! Zurich Services Corporation Risk Engineering is proud to present an informative, online educational program titled "New federal guidelines you need to know: Comprehensive Safety Analysis (CSA) 2010 program". This program is designed to help your company become aware of and understand new federal guidelines for commercial vehicles that can significantly impact your fleet operations. CSA 2010 is a major initiative of the Federal Motor Carrier Safety Administration, which will result in increased Agency auditing and interaction with your business.
